

## **COMPUTER, PROJECTOR, AND DISPLAYS**

Gary provides his own PC laptop running Windows 10 with Thunderbolt 3 (USB-C). The PC also has an HDMI port directly into the computer. Gary's entire presentation is presented from his computer using a 16:9 display ratio. Gary can provide his own slide control directly to his PC.

## **MICROPHONE**

Gary requires a wireless lavalier microphone connected to a professional audio system.

## **AUDIO**

Audio can be output from Gary's PC via the HDMI port or a standard 3.5mm analogue headphone jack.

## **AV TESTING / SOUNDCHECK**

Gary requires an A/V check no fewer than 30 minutes before beginning his program.

## **CONFIDENCE MONITORS**

Gary strongly prefers at least one confidence monitor, if possible.

## **NO PODIUM**

Gary prefers no podium on the stage. If one must be present, it should be located at the back of the stage so that his movement and stage views are not obstructed.

## **INTERNET ACCESS**

Gary will have all videos, audio, and other content embedded in his slide deck. No internet access will be necessary for the presentation.

## **BEVERAGE**

Please have a bottle of water available for Gary while on stage.
